

# ELEVATOR AND GEOKEY WORK TOGETHER TO PROVIDE A SECURE AND EFFICIENT WORKPLACE

## OVERVIEW

Elevator Spaces, a coworking/warehousing center offering space for small businesses and entrepreneurs to work and grow, wanted an access control solution for their building that was secure, improved workflow, and uplifted businesses in the local Omaha area.

### Key Metrics

Elevator installed a Geokey door controller in June of 2023. Here is all that we have been able to accomplish together:

 **5**  
Access Point Controlled

 **164**  
Users

 **2,839\***  
Mobile unlocks to date

*"(Geokey) is very intuitive, user friendly, and the user management system is very solid. But what's best about Geokey is the humans behind (it), the customer service you will have, and it will always be a five-star experience."*

-Emiliano Lerda , Co-Founder of Elevator

## SOLUTIONS

Geokey's mobile access solutions met their needs and have brought a new level of security and peace of mind. Elevator has implemented Geokey's access control solution for its exterior doors, including its main entranceway. Elevator clients have also been given the opportunity to have Geokey installed in their individual spaces, allowing them to access the building and their area all from one platform.

While providing top-tier security and convenience, Geokey and Elevator are also working to empower local businesses and create a supportive ecosystem where entrepreneurial success can thrive.

## BENEFITS

1

### Access They Can Control

With Geokey, only members of the Elevator community have access to the co-working/warehousing spaces, giving peace of mind to staff that their building is secure.

2

### Increased Convenience and Efficiency

Elevator clients can access the building quickly, and staff can easily keep track of who is utilizing their building. Individual clients can also install Geokey and manage all their access control from one platform.

3

### Community Building

Elevator and Geokey being clients of each other helps to foster a building up of the community within the coworking space, and encourages other businesses to get involved.
